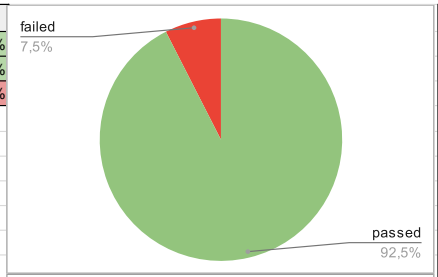
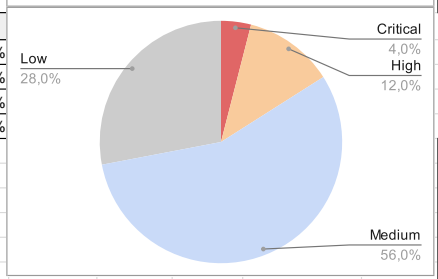
Product Description	Huntd is a comprehensive job search and application tracking app designed to assist job seekers in their quest for employment. With its user-friendly interface and powerful features, this app is essential for individuals actively seeking job opportunities.					
Project Description	Mission of the project	Conduct testing to verify the quality of the web and mobile application.				
		Ensure the application is released without defects.				
	Project output product	Test Summary report and Defects evaluation				
	Project Type	Testing				
Project Duration	Start date	31.01.2026	End date	23.02.2026		
Test Objectives	The test objectives are the functionality of the web version and mobile version of the “Huntd”. The project focuses on the possibility to interact with the main objects of the website and app.					
	For Website the main objectives: - Verify that all main web features are functional and accessible on both desktop and mobile browsers. - Test the interactive objects on the website (buttons, links, forms, menus, etc.) to ensure correct behavior. - Validate user permissions and access control for different roles (e.g., admin, registered user, guest). - Check navigation and workflows, ensuring users can complete main tasks without errors. - Identify and report any functional bugs, UI inconsistencies, or unexpected behavior.					
	For Mobile the main objectives are: - Verify that all implemented mobile app features are functional on the selected platform (Android or iOS). - Test interactions with main objects (buttons, forms, menus, gestures, notifications) to ensure correct behavior. - Validate permissions and role-based access within the app. - Ensure smooth navigation and workflow completion for key user tasks. - Identify and report bugs or crashes related to functional or UI issues. - Focus testing only on features that are implemented in the app; skip undeveloped features.					

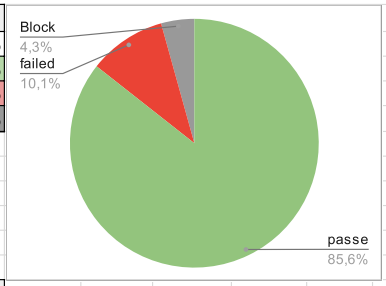
Execution Rate for **Huntd Web app**		
Executed test cases	333	100%
Passed	308	92%
Failed	25	8%



Huntd Web bugs by Priority		
Critical	1	4%
High	3	12%
Medium	14	56%
Low	7	28%



Execution Rate for **Huntd mobile app**		
Executed test cases	139	100%
Passed	119	86%
Failed	14	10%
Blocked	6	4%



Huntd Web bugs by Priority
